1 Introduction

KIP contains many unique requirements and specifications for its design.

1.1 Purpose

This document is a list of the specifications and requirements for KIP.

1.2 Scope

KIP is a web-based platform designed to teach young adults essential everyday laws. By using KIP, the average young adult should be able to recognize and understand legal situations in addition to the consequences as well.

1.3 Definitions, Acronyms, and Abbreviations

The following entries are some of the unique acronyms that are used in this document.

1.3.1 CDC

Centers for Disease Control and Prevention.

1.3.2 KIP

Knowledge Is Power.

1.3.3 MFCD

Major Functional Component Diagram.

1.3.4 UX

User Experience.

1.4 References

These references are some of the key points of information used while developing KIP.

1.5 Overview

Section 1 contains the introduction of this SRS; Section 2 contains a brief description of KIP; and Section 3 contains specific requirements of KIP organized by system features.

2 Overall Description

KIP is designed to allow young adults to learn from games while also allowing administers to keep track of accounts.

2.1 Product Perspective

KIP is a web application that teaches young adults the law through interactive games with questions and scenarios based on it.

2.2 Product Functions

KIP has features which include progress tracking, game recommendation, adaptive difficulty, games, and a robust web interface.

2.3 User Characteristics

There are 3 main roles with the usage of KIP: System maintainer who has access to the sever and code of a deployed KIP to ensure reliability; Administrator who has access to an admin account that can modify other accounts and view them; and User who has access to a standard account which can only use the main features specified in this document.

2.4 Constraints

N/A

2.5 Assumptions and Dependencies
