1 Introduction

1.1 Purpose

The SRS will describe foundational information related to KIP. Major inclusions are as follows: why KIP was created, what KIP is, who KIP's intended audience is, and how KIP provides services for that audience.

1.2 Scope

Knowledge Is Power, or KIP for short, is a browser-based legal literacy learning game platform designed to encourage young adults to learn about the legal system. KIP will be equipped with game modules that test the users' learning through quizzes, tests, and immediate feedback. KIP does not act as a legal certification system, but as a mode of education reinforcement. It seeks to supplement the legalese taught within the standardized education system.

1.3 Definitions, Acronyms, Abbreviations

KIP: Knowledge Is Power.

UX: User Experience.

CDC: Centers for Disease Control and Prevention.

1.5 Overview

Onward the SRS describes the main features of user roles, constraints, and assumptions & dependencies related to KIP

2 Overall Description

2.1 Product Perspective

KIP is structured as a web-based educational service built around learning modules, interactive games, user progress data, and source-backed legal content. The system presents users with short misconception-based quizzes and longer branching scenarios, then uses their performance to recommend future practice. Its software components support account access, scenario delivery, feedback generation, content curation, source referencing, and persistent progress tracking. The goal of these features is to assess users' current legal understanding, strengthen their recognition of legal situations, and reinforce informed decision-making through repeated low-stakes practice.

2.2 Product Functions

KIP uses focused games, real-world examples, curated media, and official resources to educate young adults on practical legal boundaries. It aims to assess, improve, and reinforce legal knowledge among tech-friendly youth through repeatable, low-stakes interactive activities. Its user experience (UX) is designed to increase recognition of legal situations, improve decision-making skills, and strengthen long-term retention of legal concepts. One game KIP will utilize is "Fact or Fiction?".

2.3 User Characteristics

KIP maintains three user roles, titled Maintainer, Administrator, and User. Users are the majority role and have access to KIPS module-based learning system. Maintainers retain KIP's deployment functionality and have access to KIP's code. Administrators retain Maintainer privileges and have capabilities to make changes related to account access.

2.4 Constraints

N/A

2.5 Assumptions and Dependencies

N/A
